## ALUKON roof-line door

An up-rolling roof-line door provides more space than a regular garage door. The small fitting dimensions allow more passage height. Others need extra space for a wide swinging garage door, you can park your car comfortably right in front of the garage and keep access to it.

### MODERN DRIVE TECHNOLOGY

Special rollers guarantee a quiet and smooth run of this garage door with low maintenance, the operation is possible by radio-controlled handheld-transmitter or key-operated button spring system, in case of need with little effort. An integrated courtesy light completes the system.

### DESIGN AND FUNCTIONALITY

Many available curtain and guide channel colours allow an individual configuration. Our optional solar and rechargeable battery drives make independent of electricity; available vision and ventilation profiles are the perfect functional completion of our range.

<b>Colours</b>	Curtain colours	white	light grey	dark brown	natural	light beige
		moss green	jamaican brown	grey anthracite	charcoal	purple red
		fir green	cobalt blue	teak	golden oak	mahogany
Guide channels in white and all available RAL colours						

You can operate your roof-line door with a handheld-transmitter or by special version per cigarette lighter from your car.
